FULL STACK MERN DEVELOPER

As a software engineer, I am passionate about creating efficient and innovative solutions to complex problems. With a solid foundation in computer science and a keen eye for detail, I strive to deliver high quality code that meets user requirements and exceeds expectations.

SKILLS

- Next Js
- React Js
- TypeScript
- JavaScript
- Redux
- Tailwind css
- Bootstrap
- Node Js
- Git
- Bit Bucket
- API Integration
- Express js
- MONGO DB
- MySQL
- HTML
- CSS

EDUCATION

**Technocrats Institute Of Technology
and Science, Bhopal**

Bachelor Of Technology in Computer Science
2020 - 2024

Bonnie Foi Co-ed School , Bhopal , M.P.

Higher Secondary School
2020

Shanti Dham Sr. Sec School , Atarra, U.P.

High School
2018

PROFESSIONAL EXPERIENCE

Front End Developer

Subhx Info Tech | January 2024 - Present

- Developed and maintained frontend components for various projects using React.js and Next.js.
- Collaborated with cross-functional teams including designers, backend developers, and project managers to deliver high-quality solutions on time.
- Implemented responsive designs and optimized application performance for Web platforms .
- Participated in code reviews and provided constructive feedback to team members to ensure code quality and adherence to best practices.
- Contributed to architectural decisions and technical discussions to improve development processes and workflow efficiency.
- Actively stayed updated with the latest frontend technologies and trends, integrating them into projects to enhance user experience and maintain competitiveness.

Free Lancing

2022 - 2023 December

- Proficient in HTML5, CSS3, JavaScript (ES6+), and responsive design techniques.
- Experience with front-end frameworks/libraries such as React.js, Next js .
- Familiarity with version control systems such as Git.
- Understanding of web security best practices and performance optimization techniques.

PROJECTS

Crypto Trading Exchange (Bit24hr)

- This project is made with Next Js , for data centralization uses Redux for state management , uses Tailwind Css for styling , etc.
- Bit24hr provides real-time market data, user authentication, intuitive trading interface, wallet management, order book, trading analysis tools, notifications, security measures, and responsive design.
- Bit24hr employs a client-server model with Next.js and RESTful APIs, Redux for state management, reusable UI components, and server-side rendering.
- Bit24hr plans to add more cryptocurrencies, advanced trading features, social functionalities, and improve security measures.

IMDB Movie Rating App

- The IMDb Movie Rating App is a web application designed to help users discover, explore, and rate movies.
- This project is made use of React js , Redux tool kit for state management , axios for get web API data , etc.
- Users can search for movies by title, genre, release year, or cast. The app provides detailed information about each movie, including synopsis, cast and crew, trailers, and related recommendations.

Code Editor

- The Code Editor is a web-based code editor platform built using Node.js, Express.js, and Next Js. It aims to replicate the functionalities and user interface of Visual Studio Code, providing developers with a familiar coding environment accessible through a web browser.

E-Commerce Application

- Built a dynamic and responsive user interface using React.js and Redux for state management.
- Integrated with a Node.js backend and MongoDB to handle user authentication, product management, and order processing.
- Implemented client-side validation and error handling to ensure smooth user interactions.
- Collaborated closely with backend developers to optimize API performance and reduce load times.

Task Management Application

- Built a dynamic and responsive user interface using Next.js and Redux for state management.
- Created Features for ticket creation ,Team managing , Task list by Order and much more.
- Integration and API allowing for seamless data exchange and synchronization .
- Ensured secure authentication and authorization mechanisms for user access control.
- Testing to ensure application reliability and performance across various devices and browsers.

Social Media Application

- Tech Stack: Node.js, React, MySQL
- Developed a full-stack social media application enabling users to create profiles, post updates, and engage with other users through likes and comments.Integration and API allowing for seamless data exchange and synchronization .
- Implemented user authentication and authorization using JWT tokens and session management.
- Designed a scalable database schema using MySQL for user profiles, posts, and social interactions.
- Built a dynamic and responsive user interface using React, featuring dark and light mode toggle for improved user experience.
- Integrated RESTful APIs for efficient data management between the front-end and back-end.
- Implemented role-based access control and secure data handling.
